An amplifier, electronic amplifier or (informally) amp is an electronic device that can increase the power of a signal (a time-varying voltage or current). It is a two-port electronic circuit that uses electric power from a power supply to increase the amplitude of a signal applied to its input terminals, producing a proportionally greater amplitude signal at its output.

Technocracy is a proposed system of governance where decision-makers are selected on the basis of their expertise in their areas of responsibility, particularly scientific knowledge. This system explicitly contrasts with the notion that elected representatives should be the primary decision-makers in government, though it does not necessarily imply eliminating elected representatives.
