Deficits in cognitive functions that rely on the integrity of the frontal and temporal lobes are characteristic of normative human aging. Due to similar aging phenotypes and homologous cortical organization between nonhuman primates and humans, several species of macaque monkeys are used as models to explore brain senescence.

Why is adolescence a critical time for preventing drug addiction? As noted previously, early use of drugs increases a person's chances of becoming addicted. Remember, drugs change the brain—and this can lead to addiction and other serious problems. So, preventing early use of drugs or alcohol may go a long way in reducing these risks.

Abstract. We use a unique administrative dataset of over 10,000 taxi drivers in Singapore to study the labor supply decisions of these drivers. Our results indicate that both intra-day and across days, cab drivers deviate from the neoclassical economic model and that their labor supply is affected by a reference level of income.
