

### **metcalf and eddy wastewater pdf**

Enhanced biological phosphorus removal (EBPR) is a sewage treatment configuration applied to activated sludge systems for the removal of phosphate.. The common element in EBPR implementations is the presence of an anaerobic tank (nitrate and oxygen are absent) prior to the aeration tank. Under these conditions a group of heterotrophic bacteria, called polyphosphate-accumulating organisms (PAO ...

### **Enhanced biological phosphorus removal - Wikipedia**

Wastewater treatment is the process that removes the majority of the contaminants from wastewater or sewage and produces both a liquid effluent suitable for disposal to the natural environment and a sludge. Biological processes can be employed in the treatment of wastewater and these processes may include, for example, aerated lagoons, activated sludge or slow sand filters.

### **Water treatment - Wikipedia**

The need for more stringent effluent discharge standards as prescribed by the Environmental Management Act 20:27 to protect the environment can be sustainably achieved with the aid of Activated Sludge Models.

### **Characterisation of raw sewage and performance assessment**

biogas . HANDBOOK . 7 . Foreword. One of the main environmental problems of today's society is the continuously increasing production of organic wastes.
